

WHAT DOES
SUSTAINABILITY
MEAN TO YOU?

What do we do that has a negative impact on our environment?

Now we are going to just think about plastic!
What things do you use that are made out of plastic?

What could you do that will have a positive impact on our environment?

How can you use less plastic items?

Swap your plastic bottle for a reusable metal bottle. Instead of buying a plastic bottle of water when you are out and about many restaurants will now refill your bottle for you.

Instead of buying plastic straws you could use paper or metal ones. Some restaurants are going to stop using plastic straws in an effort to be more sustainable.

Did you know many cafes will now refill your travel mug or mug so that you don't need to use a disposable cup?
